USSR RAIL LINE SEARCH FOR ICBM ACTIVITY

25X1D

25X1D

25X1D

This report presents the results of a search for ICBM activity along rail lines in the USSR on KEYHOLE photography from [REDACTED]

The search was conducted according to established criteria as explained in NPIC/R-743/64.

This search has negated, in terms of ICBM activity, approximately 1,856 nm of Soviet rail line and has produced no evidence of ICBM activity that has not been previously reported.

A total of 12 overlays to World Aeronautical Charts showing all rail lines searched with negative results have been prepared. These

overlays also show the location of all ICBM launch complexes identified to date and the applicable KEYHOLE mission pass number on which the rail lines were covered. Copies of the 12 overlays, which constitute a Graphic Supplement to this report, have been forwarded to the CIA requester and to the TALENT Control Officers of the Army, Navy, Air Force, DIA and NSA. Further reproduction and dissemination of these overlays to subordinate commands will be the responsibility of the above agencies.
